DANA SMID (SMALL/MID) CAP VALUE EQUITY STRATEGY

As of March 31, 2024

The SMID (Small/Mid) Cap Value investment philosophy reflects our belief that attractive returns can be achieved over a full market cycle by combining a systematic, quantitative approach with traditional fundamental analysis.

Composite Performance

Investment Process

Investment Process

The process begins by screening a universe of approximately 2000 stocks for:

- Market capitalizations between \$250 million and \$20 billion.
- · Minimum of three years trading history.
- · Research coverage by at least five analysts.

We use a quantitative investment model based on earnings, book value and cash flow, combined with a qualitative fundamental overlay, to determine the relative attractiveness of each stock in our universe. Buy candidates are generally selected from the top 20%. We further examine these candidates to verify fundamentals, confirm sufficient liquidity and establish an appropriate level of conviction.

Typical Portfolio Structure

The portfolio is constructed from the most compelling investment opportunities identified in our fundamental verification process. Incremental returns are intended to come from individual stock selection.

Typical Portfolio Structure Cont'd

- 125 to 150 securities.
- Position size generally between 0.5% and 1.5%, with a 5% maximum.
- Cash equivalents less than 5%.
- Sector weights controlled to within ±5 percentage points to the eleven Russell 2500® Index economic sector weights.
- Positions in stocks whose market capitalizations have grown beyond \$20 billion may continue to be held.
- New accounts are established with the same securities and position weights as current client portfolios, regardless of market capitalization.
- Turnover expected to be less than 50% annually.

Sell Discipline

Stocks are reviewed as possible sell candidates when:

- Quantitative rankings have fallen to the bottom 40% of the research universe and/or current fundamentals are deteriorating or earnings expectations are declining.
- Analysis indicates the risk/reward opportunity of a new investment is more favorable than that of an existing holding.

Background

The SMID (Small/Mid) Cap Value strategy combines our Small Cap Value and Midcap Value products. The Small Cap Value strategy was established in October, 1994 and the Midcap Value strategy was created in January, 1999 by Senior Portfolio Manager, William (Bill) Charcalis and his investment team. Bill and his investment team have utilized the same investment process, portfolio construction rules and investment guidelines since inception of each strategy.

N.A.- The composite dispersion is not meaningful if fewer than five portfolios are in the composite for the full year.

The composite dispersion calculation is the equal-weighted standard deviation for all accounts in the Composite for the entire year using gross of fee returns. The three-year annualized standard deviation measures the variability of the composite gross returns and the benchmark returns over the preceding 36-month period

Dana Investment Advisors, Inc. is an independent federally registered investment adviser providing equity and fixed income investment management services to a broad range of clients. The GIPS® Report conforms to the Global Investment Performance Standards (GIPS®) guidelines regarding the portability of investment results.

The SMID Cap Value Composite was created on April 1, 2012. The inception date of the composite is April 1, 2012. The Composite is composed of all SMID Cap Value equity portfolios with no significant restrictions and market values greater than \$3 million.

The Composite net of fee returns are calculated by adjusting each monthly gross of fee Composite rate of return by highest applicable rate on the SMID Cap Value Strategy's published fee schedule, which is 0.75%. Actual individual account fees may vary. Policies for valuing investments, calculating performance, and preparing GIPS® Reports are available upon request.

Fees are investment advisory fees and do not include other possible expenses. Gross and net of fee performance reflects the reinvestment of dividends and all other earnings.

Periods shown prior to March 1, 2024 represent the performance record of the portfolio management team while affiliated with a prior firm. Prior to March 1, 2024, the portfolio management team members were the only individuals responsible for selecting the securities to buy and sell. Following March 1, 2024 the same portfolio management team members continue to utilize substantially the same investment and decision making process when selecting the securities to buy and sell.

Dana Investment Advisors, Inc. ("Dana") claims compliance with the Global Investment Performance Standards (GIPS®) and has prepared and presented this report in compliance with the GIPS standards. GIPS is a registered trademark of CFA Institute. CFA Institute does not endorse or promote this organization, nor does it warrant the accuracy or quality of the content contained herein. Dana has been independently verified for the periods January 1, 1992 through December 31, 2022.

A firm that claims compliance with the GIPS standards must establish policies and procedures for complying with all the applicable requirements of the GIPS standards. Verification provides assurance on whether the firm's policies and procedures related to composite, as well as the calculation, presentation, and distribution of performance, have been designed in compliance with the GIPS standards and have been implemented on a firm-wide basis. The SMID Cap Value composite has been examined for the periods April 1, 2012 through December 31, 2021, while affiliated with a prior firm. The verification and performance examination reports are available upon request.

Fee Schedule: 0.75 of 1% on the first \$50 million; 0.60 of 1% on all assets in excess of \$50 million. Actual investment advisory fees incurred by client may vary.

A list of composite descriptions is available upon request.

Please refer to the Notes section for more information about the benchmarks discussed above and the volatility of the SMID Cap Value Composite relative to such benchmarks.

Past performance is not indicative of future results.

Notes

This material is intended for the clients, authorized representatives and consultants of Dana Investment Advisors, Inc. ("Dana") and is not intended for public distribution. This material may not be shown, copied, transmitted, or otherwise given to any other person without our prior written consent. We obtained certain information from third party sources. Although we believe this information to be reliable, we have not independently verified it and cannot guarantee its accuracy or completeness.

The SMID Cap Value portfolio is a managed portfolio of 125 to 150 common stocks and is not capitalization weighted. It invests primarily in small and mid capitalization U.S. equity securities and is subject to market risk with respect to the prospects of individual companies and exposure to both particular industry sectors and/or general economic conditions. The securities of small and mid capitalization companies may involve greater risk than those associated with larger, more established companies and may be subject to more abrupt or erratic price movements.

Not every account managed by Dana in this strategy is in SMID Cap Value Composite or holds the particular securities discussed in this document. Due to varying investment restrictions or other considerations, certain accounts may be in a separate composite. The performance of the account may differ from the performance of this composite and other composites related to this strategy.

Information in this document may have been derived either from a representative account for the SMID Cap Value strategy or from your account. The source of the information is indicated on each chart, graph or page. If a representative account has been used, the representative account is in the Composite and Dana believes it most closely reflects the current portfolio management style for this strategy.

Individual account net of fee returns are calculated based on effective management fees derived from each client's actual fee schedule. The Composite net of fee returns are calculated by adjusting each monthly gross of fee Composite rate of return by the highest applicable rate on the SMID Cap Value Strategy's published fee schedule. Performance presented reflects reinvestment of income and other earnings.

Statements that are non-factual in nature, including those regarding possible future events, constitute only subjective views and/or present intentions, are not representations or warranties, and are subject to change. The views in our commentaries and other information in this document are current as of the end of the period to which this report pertains and may change thereafter. This material should not be considered a recommendation to buy, sell or hold a security or investment and should not be relied upon as research or investment advice. It should not be assumed that any investments listed were or will prove to be profitable.

All referenced indices are unmanaged, capitalization-weighted portfolios. Index returns reflect reinvestment of dividends and other earnings and do not reflect any deduction of fees or expenses associated with actively managed portfolios. Indices are for illustration purposes only and have limitations when used for such purposes because they may have volatility, credit, or other material characteristics that are different from the portfolio. It is not possible to invest directly in an unmanaged index. Account performance is not necessarily measured against each index mentioned.

The Russell 2500 Index measures the performance of the small to mid-cap segment of the U.S. equity universe, commonly referred to as "SMID" cap. The Russell 2500 is a subset of the Russell 3000® Index. It includes approximately 2500 of the smallest securities based on a combination of their market cap and current index membership. The Russell 2500 Index is constructed to provide a comprehensive and unbiased barometer for the small to mid-cap segment. The Index is completely reconstituted annually to ensure larger stocks do not distort the performance and characteristics of the true small to mid-cap opportunity set. The Russell 2500 Value Index measures the performance of the small to mid-cap value segment of the U.S. equity universe. It includes those Russell 2500 Index companies with lower price-to-book ratios and lower forecasted growth values. Beginning in June 2007, Russell expanded its company eligibility to include those companies that are domiciled and traded primarily in the U.S., but incorporated in other countries. Please visit www.ftserussell.com for more information regarding the Russell Indices. The Russell® Indices listed herein are trademarks of the London Stock Exchange Group companies.

Beta is a measure of volatility relative to an index. Fundamental beta, calculated using Refinitiv Eikon LSEG Global Equity 2.0 (USD) Model based on the portfolio holdings at a point in time, attempts to measure future risk based on market-related and financial characteristics. Such characteristics may include, but are not limited to a company's size, industry, financial situation and competition. The SMID Cap Value portfolio's fundamental beta typically ranges between 0.9 and 1.1 relative to both the Russell 2500® Index and Russell 2500® Value Index.

I/B/E/S is the Institutional Brokers Estimate System. The I/B/E/S One Year Forecast P/E uses median I/B/E/S consensus earnings per share estimates for the next fiscal year to calculate a price-to-earnings (P/E) ratio.

A list of all investments in the portfolio for the preceding year is available upon request.

Past performance is no guarantee of future results.
