Dana Investment Advisors, Inc. (Dana) claims compliance with the Global Investment Performance Standards (GIPS®) and has prepared and presented this report in compliance with the GIPS standards. GIPS is a registered trademark of CFA Institute. CFA Institute does not endorse or promote this organization, nor does it warrant the accuracy or quality of the content contained herein. Dana has been independently verified for the periods January 1, 1992 through December 31, 2022.

A firm that claims compliance with the GIPS standards must establish policies and procedures for complying with all the applicable requirements of the GIPS standards. Verification provides assurance on whether the firm's policies and procedures related to composite and pooled fund maintenance, as well as the calculation, presentation, and distribution of performance, have been designed in compliance with the GIPS standards and have been implemented on a firm-wide basis. The Dana Preferred Income composite has had a performance examination for the periods March 31, 2010 through December 31, 2022. The verification and performance examination reports are available upon request.

- **Definition of Firm:** Dana Investment Advisors, Inc. is an SEC-registered independent investment management firm established in 1980 and is not affiliated with any parent organization. Dana manages a variety of equity, fixed income, and balanced portfolios for primarily U.S. institutional, individual, and mutual fund clients.
- **Composite Creation Date:** March 31, 2010.
- **Composite Definition:** The Dana Preferred Income composite includes all fixed income portfolios that invest in U.S. preferred stocks with the goal of providing higher yields along with the liquidity available in the U.S. equity markets. The composite does not have a minimum size criterion for membership. A complete list of composite descriptions is available upon request.
- **Benchmark Description:** The primary benchmark for the Dana Preferred Income composite is the S&P U.S. High Quality Preferred Stock Index. Prior to January 1, 2016, the primary benchmark for the Dana Preferred Income composite was the S&P U.S. Investment Grade Preferred Index. At the time of the composite

creation, the S&P U.S. Investment Grade Preferred Index, though market capitalization weighted, was deemed the best fit preferred stock benchmark for the Strategy. On December 28, 2015, the S&P Dow Jones created the S&P U.S. High Quality Preferred Stock Index, with return data calculated from October 19, 2007. This index is a modified equal weighted index, which better fits Dana's Preferred Income Strategy. The primary benchmark change has been applied retroactively to the performance presentation. The secondary benchmark for the Dana Preferred Income composite is the ICE BofA US Broad Market Index. Prior to January 1, 2023 the secondary benchmark had been the Bloomberg US Aggregate Bond Index. The secondary benchmark change was made as the ICE BofA US Broad Market Index better matches the yield characteristics of the composite. The secondary benchmark change has been applied retroactively to the performance presentation.

- **Performance and Fees:** Valuations are computed and performance is reported in U.S. dollars. Gross-of-fees returns are presented before investment management and custodial fees but after all trading expenses. Net-of-fees returns are calculated by deducting Dana's actual investment management fees from the monthly gross-of-fees returns. Dana's current standard annual Preferred Income fee schedule is 0.45% on the first \$3MM, 0.40% on the next \$7MM, and 0.35% thereafter; however, Dana's investment management fees may vary based upon the differences in size, composition and servicing needs of client accounts. Policies for valuing portfolios, calculating performance and preparing compliant presentations are available upon request.
- **Standard Deviation:** The 36-month annualized standard deviation measures the variability of the monthly net-of-fees composite and the benchmark monthly returns for the period.
- **Internal Dispersion:** Dispersion is calculated using the equal-weighted standard deviation of annual net returns of those portfolios that were included in the composite for the entire year.

Past performance is not indicative of future results.
