- Performance and Fees:** Valuations are computed and performance is reported in U.S. dollars. Gross-of-fees returns are presented before investment management and custodial fees but after all trading expenses. The composite contains both traditional commission paying and bundled-fee (i.e., asset-based pricing) portfolios. Trading costs are allocated to bundled-fee portfolios at actual asset-based rates. If actual asset-based trading costs cannot be readily

identified, the entire bundled fee (which may include costs for administration, investment management, custody, asset allocation, etc.), net of Dana's investment management fees, is deducted from the gross return. Net-of-fees returns are calculated by deducting Dana's actual investment management fees from the monthly gross-of-fees returns. Dana's current standard annual Concentrated Dividend Equity fee schedule is 0.75% on the first \$10MM, 0.65% on the next \$15MM, and 0.50% thereafter; however, Dana's investment management fees may vary based upon the differences in size, composition, and servicing needs of client accounts. There is one non-fee paying portfolio within the composite, which represented 0.22% of total Composite Assets as of 12/31/2025. There were two non-fee paying portfolios within the composite which represented 1.25% of total Composite Assets as of 12/31/2022, 1.16% as of 12/31/2023, and 0.85% as of 12/31/2024. Policies for valuing portfolios, calculating performance, and preparing compliant presentations are available upon request.

- Standard Deviation:** The 36-month annualized standard deviation measures the variability of the net-of-fees composite and the benchmark monthly returns for the period.
- Internal Dispersion:** Dispersion is calculated using the equal-weighted standard deviation of annual net returns of those portfolios that were included in the composite for the entire year.
